

# Waste Water Submersible Pump

## PRODUCT DESCRIPTION

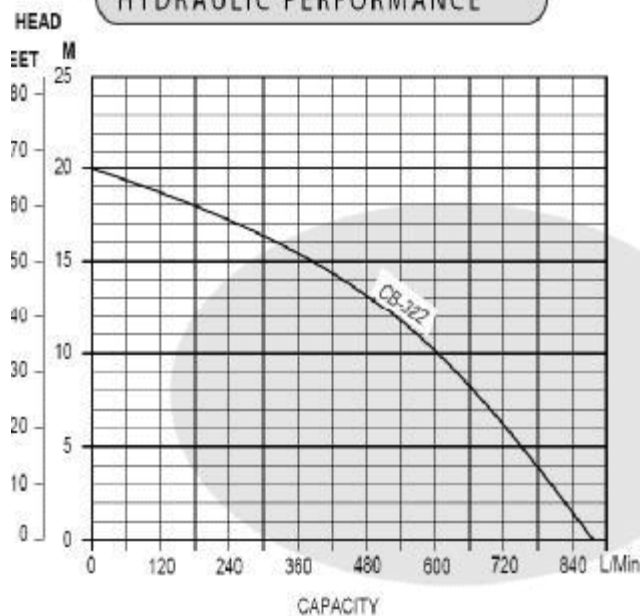

High performance single impeller waste handling submersible pumps with a choice of single or three phase electric motors.

## FEATURES & BENEFITS

- \* Open impeller centrifugal design.
- \* Able to pump soft solids in suspension.
- \* Less susceptible to blockage.
- \* Capable of higher heads.
- \* Double mechanical shaft seal in oil bath.
- \* Thermal overload relay, protected against overloading.

## HYDRAULIC PERFORMANCE

## APPLICATIONS

- \* Waste water pumping.
- \* Sump emptying.
- \* Septic effluent disposal.
- \* Water transfer.
- \* Pumping of light slurries and factory waste.

## MATERIALS OF CONSTRUCTION

PART	MATERIAL
Impeller	Cast iron
Pump casing	Cast iron
Shaft seal	Carbon/ceramic
Pump shaft	304 stainless steel
Orings	Rubber
Motor shell	304 stainless steel
Handle	304 stainless steel
Fasteners	304 stainless steel
